

Overview

Come see the most magnificent mountain range in the entire world by our well designed Everest Helicopter Tour! Lock eyes with Mount

Everest (8848 meters/29,029 feet), the tallest mountain in the world, within moments of waking up in your hotel in Kathmandu. Soar over valleys, terraced hillsides, and above the clouds to reach the unbelievable Khumbu (Everest) region of Nepal.

To trek Everest region is a beautiful indulgence into unspoiled mountain territory. However, this can take weeks and most people visiting Nepal do not have the time to have such experience. But, the Everest region is not to be missed on a visit! Therefore, we have the perfect Everest Helicopter Tour package, lasting less than a few hours to bring you to the Everest region. In fact, you will

be able to land at Everest Base Camp, the launching point for summit expeditions.

After an early morning wakeup call, we head to the Kathmandu Domestic Airport. We head out

and up above cities, villages, and Nepal's unique topography. The helicopter swivels around

ridges to get a bird's eye view of the mountains, a perspective that even Everest summiteers do

not have the privilege of. The scenery changes so quickly that with a blink of an eye, you might

miss something! Look down and see colossal glaciers, pristine alpine lakes, and mountaintop

Sherpa villages. Set your sights on Mt. Everest (8848/29,029 meters), Makalu (8481 meters/

27,825 feet), Cho Oyu (8201 meters/26,906 feet), Ama Dablam (6812 meters/22,349 feet), and

countless other breathtaking peaks. The passengers of the helicopter have a smile on their face

throughout the ride.

We disembark from the helicopter at Everest Base Camp and see the settlement of tents, full of

mountaineers preparing for their Everest ascent. From here, we can also see the infamous Khumbu Icefall. Take your time and snap as many photos as you desire; this is a once-in-a-

lifetime opportunity. You'll feel the special energy of the place as soon as you hop off the aircraft. It has a lot of history attached to it, not to mention it's one of the most beautiful places

in the world.

Then, we fly over Kala Patthar (5643m) and begin our descent. Everyone gets a window seat

on the helicopter ride, so you have your own personal view of the mountains. We arrive back

to Kathmandu between 10am and 11am, and transfer you to the hotel to spend the rest of the

day freely.

You can take our Everest Base Camp Heli Tour all throughout the year, but it is recommended

to fly during the spring and fall, as these seasons provide the most suitable weather. In the

spring, you can see the lush, blooming forests down below, while in the fall, the skies are most

clear. Winter always brings the chance of snow storms, and therefore flight cancellations.

Breeze Adventure takes care of all the logistics involved in this day tour package. Please do not

hesitate to contact us if you have any questions. We are happy to answer them!

Highlights

100% Refund if we are not able to manage flight due to bad weather
